## Agilent Technologies Transfers Real-Time Gas Analyzer to Diablo Analytical

SANTA CLARA and CONCORD, Calif., Feb. 28, 2007 -- Agilent Technologies Inc. (NYSE: A) and Diablo Analytical Inc. announced today that they have signed an agreement that allows Diablo Analytical to manufacture, sell, support and develop Agilent's 5000A Real-Time Gas Analyzer (RTGA). Agilent will continue to support its 5973 and 5975 mass spectrometer (MS) platforms for RTGA systems.

The Diablo Analytical 5000A RTGA, as it is now called, is a process-development MS that allows direct and continuous monitoring of gases from a wide range of energy, chemical and pharmaceutical processes. Based on the proven, reliable and widely available Agilent 5973 and Agilent 5975 MS platforms, it is ideal for fast-paced development projects that require flexibility and proven performance.

Diablo Analytical plans to begin shipping the systems in the second quarter of 2007 and to provide additional product extensions. The company will market and sell the product through its distribution partners.

“We are excited to add the 5000A RTGA to our suite of gas phase analytical products,” said Scott Hein, president of Diablo Analytical. “We co-developed the system with Agilent, and we are very familiar with its key applications and customers.”

“Agilent is pleased to continue working with Diablo Analytical as an established channel partner for gas phase analytical solutions, including the RTGA 5000A,” said Chris Toney, vice president and general manager of Agilent’s GC/MS and ICP-MS business.

#### About Diablo Analytical Inc.

Diablo Analytical Inc., an Agilent channel partner since 1995, specializes in development and support of high-technology analytical instrumentation for gas phase chemical measurements. Diablo integrates application know-how, software automation and optimized hardware to deliver instruments to meet the requirements of each customer. Its client base includes major industries, key regulatory agencies and the service laboratory sector, with applications ranging from petrochemical, electronics, health and safety, and environmental to materials testing and online product quality control. Diablo is also an Agilent Technologies Channel Partner and Authorized Support Provider. Additional information is available at [www.diabloanalytical.com](http://www.diabloanalytical.com).

#### About Agilent Technologies

Agilent Technologies (NYSE: A) is the world’s premier measurement company and a technology leader in communications, electronics, life sciences and chemical analysis. The company’s 19,000 employees serve customers in more than 110 countries. Agilent had net revenue of \$5.0 billion in fiscal 2006. Information about Agilent is available on the Web at [www.agilent.com](http://www.agilent.com).
